BUILDING A PERSONAL WEBSIWEBSITE USING HTML,CSS,AND JAVASCRIPT
PROJECT TITLE

PROBLEM STATEMENT

Many students and professionals lack an online presence to showcase their skills, projects, and achievements effectively. A personal website helps in creating a digital identity and portfolio.

PROJECT OVERVIEW

- This project demonstrates how to build a personal portfolio website using:
  - HTML for structure
  - CSS for styling
  - JavaScript for interactivity
- It provides a platform to showcase projects, skills, and contact details.

End Users

- Students
- Job Seekers
- Freelancers
- Professionals

TOOLS AND

TECHNOLOGIES

- HTML5
- CSS3
- JavaScript (ES6)
- Code Editor (VS Code)
- Git & GitHub
- Browser Developer Tools

PORTFOLIO DESIGN AND LAYOUT

- Responsive design for mobile and desktop
- Simple and clean navigation
- Sections: Home, About, Projects, Contact
- Consistent theme with CSS
- Use of modern web design practices

FEATURES AND FUNCTIONALITY

- Interactive navigation menu
- About Me section with personal details
- Project showcase with images and descriptions
- Contact form with validation
- Responsive layout
- Smooth scrolling and animations

RESULTS

- Successfully built a personal portfolio website
- Showcases projects and skills
- Provides an online presence
- Example screenshots of the website layout and design
